# COMP804: ASSESSMENT TASK 3
# ASSIGNMENT 1

Abstract

## FINAL IMPLEMENTATION REPORT

Geetanjali Rajahan Magar
Student ID: 6675372

# Introduction

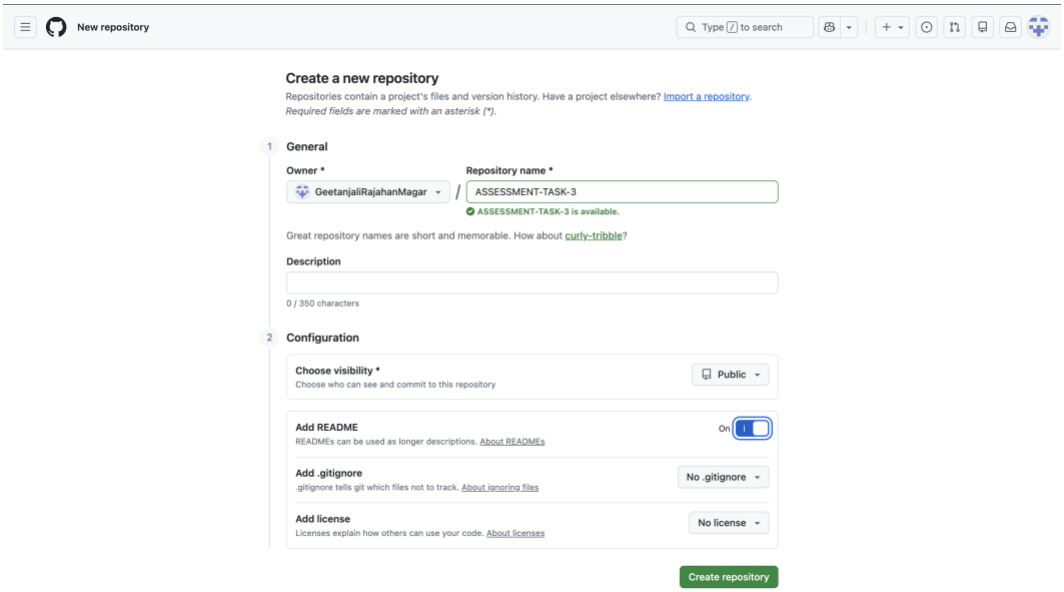
This report documents the implementation and deployment process of the website developed for COMP804 Assessment Task 3. The website includes solutions for Tasks 1–4 using HTML, CSS, and JavaScript. This report provides evidence of creating a GitHub repository, executing required Git commands, and successfully uploading all source files to a public repository.

# Local Development Environment

The website was developed locally on macOS using a structured project folder containing:

- HTML file (single webpage including all tasks)
- Image files for Task 3 and Task 4
- CSS styling (internal style section)
- JavaScript functionality
- Final implementation report file

<u>The local Git repository was initialized using:</u>



git init

```

# Connecting to Existing GitHub Repository

An existing public GitHub repository was created under the account:

**GeetanjaliRajahanMagar**

The local repository was connected to the remote repository using:

git remote add origin https://github.com/GeetanjaliRajahanMagar/ASSESSMENT-TASK-3.git

To verify the remote connection:

git remote -v

Screenshot 3: Terminal output showing configured remote repository.

# Adding and Committing Project Files

<u>All project files were staged and committed using:</u>

git add

git commit -m "Initial commit for COMP804 Assessment Task 3"

This created the first commit containing all source code and supporting files.

Screenshot 2: Terminal output showing successful git add and git commit.

# Authentication and Push to GitHub

GitHub no longer supports password authentication. A Personal Access Token (PAT) was generated through GitHub Developer Settings and used for authentication during the push process.

***The project was pushed using:***

git branch -M main

git push -u origin main

Since the remote repository already contained initial files, a merge was required:

git pull origin main --allow-unrelated-histories

The merge commit was saved, and the project was successfully pushed.

## Repository Verification

After pushing, the GitHub repository was checked to confirm:

- All project files were uploaded
- The repository is public
- Source code is accessible for marking

Screenshot 5: GitHub repository page showing uploaded files.

## Public Repository Link

GitHub Repository:

https://github.com/GeetanjaliRajahanMagar/ASSESSMENT-TASK-3

## Conclusion

All required Git commands were successfully executed. The website developed for Tasks 1–4 has been uploaded to a public GitHub repository. The repository is accessible for assessment and contains all source files and supporting materials as required.
